**Bio:**

Mike Phillips, is Professor of Interdisciplinary Arts at Plymouth University and Director of Research at i-DAT.org. His R&D orbits a portfolio of projects that explore the ubiquity of data 'harvested' from an instrumentalised world and its potential as a material for revealing things that lie outside our normal frames of reference - things so far away, so close, so massive, so small and so ad infinitum.

He manages the Fulldome Immersive Vision Theatre ([www.i-dat.org/ivt/](http://www.i-dat.org/ivt/)), a transdisciplinary instrument for manifesting (im)material and imaginary worlds. The IVT supports interdisciplinary projects working with the Plymouth Dental and Medical Schools, Deep Physics and Astronomy groups, Earth Sciences, Psychology, Architecture and Environmental Building, as well as providing public screenings and supporting artists, musicians and performers through residencies and workshops. The IVT was instrumental in establishing the Fulldome UK festival <https://www.fulldome.org.uk/>

He has secured research funds from regional, national and international sources including: Arts Council England (GFA's and National Portfolio Organisation status), NESTA, AHRC, EPSRC, British Council, EU (European Culture Programme, ESF and is Co-I on two EU FP7 Marie Curie ITN's "CogNovo: Cognitive Innovation" (Psychology) (€4.1m) and ALerT (Geological Sciences)), and Co-I: The South West Creative Technology Network (SWCTN - £6.5 million Research England), as well as funding through Knowledge Transfer Partnerships, industrial sponsorship (Apple ARTS, IBM Smarter Planet, Macromedia/Adobe, Sony and BT).

His extensive PGR supervisory experience dates back to the early 1990's, with 77 completions across i-DAT, the international framework of the Planetary Collegium (Plymouth, Milan, Kefalonia & Zurich), Artificial Intelligence/Robotics and Geology as well as students in two EU FP7 Marie Curie ITN projects.

Phillips is an active member of an international transdisciplinary community that engages with immersive, interactive and performative technologies. He was a member of the ISEA International Board (Secretary 2017-2022), the Arts Council England SW Digital Reference Group, and is a founding Partner and Organiser of FullDome UK ([www.fulldome.org.uk/](http://www.fulldome.org.uk/)).

For more information see the i-DAT web site at: [www.i-dat.org](http://www.i-dat.org).
