i-DAT has developed a **Quorum** model for real-time data feeds at Ventruefest. Running from a networked Raspberry Pi vision sensors and twitter feeds the Quorum Fest tracks human activity and communication around the event through a dynamic 3D datascape.

The inaugural **Venturefest South West**, at Sandy Park Exeter, is a showcase of the cutting edge innovation and entrepreneurship coming out of Devon, Cornwall and Somerset. The event will bring hundreds of entrepreneurs and businesses together with innovators and academics to fuse business ideas with novel research and opportunities for funding.

The day will see speakers and masterclasses from the world of investment, market leaders sharing their insight plus success stories from trailblazing entrepreneurs. Venturefest South West promises to celebrate the region’s most exciting innovators as well as facilitate new interactions, collaboration and investment.
